Vermont Bentwood Handcraft

MORE ITEMS AVAILABLE ON OUR WEBSITE!!!

Materials: We work with four primary companies based in Maryland, Michigan, Colorado, and New York to supply our collection with Triple AAA graded woods from around the world. These woods are all surface grain cuts to represent the wonderful and unique patterns to perfection and eliminate all end grain exposure.

Lamination: Ten individual pieces come together for each earring and provides dimensional stability for wood, optimizing strength, and allowing our curved designs to last the test of time.

Curved Designs: Steam bending techniques give each item depth with a slight bend and adds to the overall aesthetic value.

Multiple Species: Each piece is designed to bring together multiple woods with the fronts and backs of each earring having there own unique combinations.

Coloring: Pressurized dyes using a vacuum pressure vessel insure the most uniform coloring without transferring from one side or changing the crystal clear finish.

Finish: This includes a vinyl sealer with conversion varnish topcoats totaling six layers of finish for maximum durability. We also use two compatible water white base finished avoiding any unwanted ambering over time.

NEW PRODUCTS AND DESIGNS TO COME!!!
